REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW, THURSDAY, MARCH 29th, 1928 Number 11

Chuncil Still Gett Offers For Property

AT LAST MEETING EIGHT RESIDENTS WRITE MAKING OFFER FOR HOUSES AND OTHER PROPERTY BELONGING TO TOWN

Judging from the numbe of orffers for buildings belonging to the town, which have been pouring in to the council for the last few metings, it will not be long till every married man in town will own his own home. If present conditions continue it will mean a big improvement, not only to the appecrance of the town, but also in the town's financial position, as much of the now vacant property will again be back into a tax-paying basis

At last Monday's council meting eight applications accompanied by offers were received for buildings, shacks and lots. All were reerfed to the building committee giving them power to act after invesigating. The offers were from The Pressed Brick Co,, Mrs, D. Jackson, L. D. Easton, J. W. McLachlan, O. Sween, W. Smith C. Evans, and E. H. Sellhorn.

At the meting Mayor Worts occupied the chair and the olfowing were present: Councillors Brydle, Broughton, Cox, Campeau and Champ.

A letter from the Utilities Commision referring to the asessment and estimates was read and filed. W. C. Smith,, M. L. A., wrote Council that he was still working to have the main line gfrades around Redcliff gravelled. He stated that promising progros was being in this direction. The secretary was instructed to acknowledge receipt of same and thank Mr. Smith for his interest in this matter.

Mr. Vogstad wrote stating that he would purchase house and lot on Second stret at price set by the Building committee. The miliary authorities wrote saying they cosidered amount asked for rent for the Reid building was too high. There wcs considerable discussion on the question The May,or expresed the view that since the building had been idle for a number of years and since amount the militia officesr were willing to pay was considedably more than the taxes on the property, an effort should be made to get it occupied. He also pointed out that if the militia got the building they would equip it as a gymnasium and allow the young people of the town the use of it for certain nights each week. This, he thought, should be take into consideration as something of that nature was badly needed in own. The matter was left i abeyance for the preset,

On request, the secretary submitted a list of tennants now renting houses from the town and also a list of all those who are in arrears for their rent On motion of Councillors Campeau and Cox the police oficer was istructed to interview all delinquent renters with instructions o notify them that unless some satisfactory arrangement be made for the payment of arrears they would be given a month's notice to vacate.

Councilor Campeau drew attention of council to the number of young children who are on the streets at all hours of the night. He thought that if parents did not keep them off the streets at night he council should pass a bylaw regulating the hours for children to run at large. The sugestion met with the approval of all present, some expresing the view that the parents should be prosecuted for allowing such conluct. Definite action was deferred awaiting the arival of child welfare officials who are expected in town this week.

Town solicitor Baird reported re bills presented to the town from the C. P. R. for repairs to the crossing at mile 6.0 in the town limits. Mr Baird advised council that in his opinion the town was liable for this account. The bill was then ordered paid.

Ed. McCombs, Labor candidate, and J. Hole, of Medicine Hat were in town today making arrangements for the campaign.

Rebcliff Boys to Sing At Grand Recital

To Be Held in Empress Theatre, at Medicie Hat, April 12

Pupils if Messrs. R. Bullen, R. H. Ragnan and Paul Knapper will give a grand recital in the Empress theatre, Medicine Hat, on Thursd y, April 12.

This recital promises to be one of the biggest things of its kind ever put over in the city. Everyhing is being done to make it an outstanding success. Redcliff will be represented by three well kown boys who are pupils of Mr. Bullen. These are Masters McElvogue, McCleary and Sellhorn. Tom sins ga solo and is in a duet with Miss McBain, one of Medicice Hats promising young vocalists. He is also to be heard in a duct with Sam McCleary. Miss McWain, also of Redcliff, is one of the soloists. Altogether over 30 pupils will be takig part in this recital. At the close of the concert all he pupls will take part in a grand closing number. Tickets are now on sale and may be secured from any of the Redcliff pupils taking part. Adults .50c and 25c for all students.

REPORT OF LANGUAGE CLASSES FOR MARCH

Latin IX Grade—Howard Duffield, 90; Hugh Matheson 86; Billy Sellheon 78; FFrancis Buchholz 70; Nona Rose 52. Grade X—Elsie Frey, 97; Phyllis Sanderson, 96; Howard Duffield 87 Murial Collard. 78; Nona Rose, 72; Tom McElvogue, 70; Helen Matheson 62; Irene Buchholz 55;. Two students less than 50 per cent.

FFrench, Grade XI—Tom McElvogue 84; Francis Buchholz, 81; Jean Moore, 76; Evelyn Hicks, 70; Billy Sellhorn, 70 Hugh Matheson, 68.

Grade X FFrench—Howarrd Duffield, 90; Murial Collard, 88; Lucy Blades 82; Jessis Muryn, 76; Nancy Martin 70; Irene Buchholz 65;; Ruby Ferns 65; Maisie Hill 63; Helen Matheson 62; Etta McLean, 50.

Mr. S. Y. Taylor, who has been Grand Secretary of the Masonic order in Alberta fot he past 12 yeas, died suddenly in Calgary yesterday.

Football Club Has Successful Social

Larye Crowd in Attendance And All Have A Good Time

Redcliff turned out in full force for the whist drive and dance held last Friday evening under the auspices of th local fooball club. As a result the club wil have a nice lite nest egy with which to start off the season's operations.

More than the usual number took part in the waist drive. This kept the committee busy keeping track of the players and the interest wan kept up to the finish. Mrs. E. Cooke won the first prize and Mrs. Fitzhenry, who took a gent's part, won the gent's first. The consolations went to Mrs. Cathcart and Mr. Hall of Calgary.

It was a lucky night for the ladies. In the spot dance Mrs. Richardson and Mrs. Risser, who were dancing together, won the prize.

The five-piece orchestra got the large crowd on the floor for every dance and kept them i good humor all evenig. The music was splendid and added much to the sucess of the evening.

The committee and members of the football club wish us to thank the public for their liberal patronage and also the ladies who provided and looked after the serving of the lunch.

TINY MAY McAVOY AGAIN WITH BIG CONRAD NAGEL

May McAvoy and Conrad Nagel, the steler combination that made such a hit in "Grumpy,' several years ago, is revived for the first time in Warner Bros. production "Slightly Used," directed by Archie Mayo. They are suplemented by an exceptionally strong supporting cast which includes some of the best. "Slightly Used," a comedy of yiuth and live, comes to the Dreamlqnd theatre, Medicine Hat, next Monday for a run of 3 days.

The ladies of St.Mary's church are making arrangements for a sale of home cooking and sewing to be held on Saturday, April 7th from two till siv o'clock in the afternoon. An Easter fish pond will be one of the attractions. The event will be held in the Cliff Hall.

Stampede Meeting

Owing to the absence of the President the stampede meeting called for last Tuesday evening did not macrialise, but it has ben decided to call anothre general meeting for next Monday evening, April 2nd, at 8 o'clock in the Legion reading room. A special appeal is made for al old commitee men ond all merchants and citizens to attend the meeting.

Girls Basedall Club Organized Last Night

Decide to Have Whist Drive and Dance April 20th

The girls' basedall club got away to a good start at the organization meeting held last evening. The girls turned out in ul forec and keen interest was shewn in the meeting.

The club was organized for the season with the following officers:

Hon. Presidents Mayor Worts and Messrs. H. Champ, K. S. Hodge, C. T. Hal, W. Campeau and E. L. Stone.

Pers.—Peggy Patterson,
Vice Pres.—Maggie Dacre.
Sec.-Treas.—Elsie Frey.
EX. Com.—Mrs. Barr, Mrs. Sheldon, Beatirice Tester, Mr. Oakland and Ortha Besler.

The selection of a captain and managers were left to the executive.

The financial statement showed a small balance left over from last year To augment this the girls decided to put on a whist drive and dance in Clif Hall on Friday evening, April 20. Mrs. Sheldon, Mrs. Barr and Lizzie Paterson were appointed a committee to make the necesary arrangements fort he event the proceds from which wil be used to secure new equipment for the club. As our girls put up a good showing last year they may be expected to do even beter this year if they get the support and encouragement necesary.

A ten round prize ring battle, guaranted to be as real as an actual fistic engagemen would be, is one of the feaures of the Univrsal-Jewel producion "Alias The DDeacon," which is now showing at Dreamland the tre, Medicie Hat. The handsome leading man stages a thrilling battle against the old rig veteran.

"Wanted a Wife" Was Great Success

Church is Filled to Overflow For The Occasion

Gordon Memorial church was taxed to capacity to accommodate the large crowd which attended the play, "Wanted A Wife," put on on that ocasion by a number of young people of the conregation.

The play was full of action and interestin ingcidents from start to finish and was liberally punctuaed with comedy furnished by Ed Cook and Tom McElvogue.

The play centred around Ed Cooke, who had been left a large fortune by a grad uncle. Unfortunately for Mr. Cook the will had certain strings attached to it, requiring that he should be married within a certain time and stipulating the kind of wife he should marry, or forfeit his right to the fortune. The "plans and specifications" for the said wife furtherr complicated matters as they were not in keeping with the young man's idea of what his wife should be. Naturally the newly created millionail had a flock of young girls afterr him when the news of his fortune spread, but he was constantly confronted by his lawyer with the terms of the will. These furnishel amusing predicaments, especially when Miss Learmonth very cleverly tried to fill the requirements of the uncle's will, but the young man always came up smiling, much to the disappointment of the foruns hunting girls. Finally he finds the right girl who satisfies both the uncle's lawyer and the young man himself. She was an inocent country girl portrayed by Miss Pinder in a very able manner

The cast was a lengthy one, made up of many different types which gave ample opportunity for variety, and so well did each porray his and her part that it would be difficult to single out any for speciel menion. On the whole the play was a grea success and showed that the young people taking part have considerable adility along that line.

The Board of Railway Commissioners have announced that the period for shipping Alberta coal east at the rate of $6.75 per ton would be from April 15th to July 15th.

Tuesday May 1st Is The Date Set For By-Election

TO FILL VACANCY IN THIC CONSTITUENCY BY DEATH OF THE LATE C. S. PINGLE -- THREE CANDIDATSE NOW IN FIELD

A writ for the Medicine Hat by-electsin has been isued, the date set being Tuesday, May 1st. This provinial by-election is for the purpose of filling the vacancy created by the death of C. S. Pingle, late menbcs for the constituency.

This anouncement is of interest to Redcliff as it is part of the Medicine Hat constituency. Preliminary arrangements have already been made locally for the election. At present three cadidates are in the field. These are J. H. Hendrick, Conservative; H. Lung, Liberal, E. McCombs, Labor.

Will Drill For Oil At Suffield Soon

Equipment is Now Being Moved To The Location Selected

H. B. Pearson, of Calgary, who is in charge of oil drilling operations north of Suffield, for the Onario-Alberta syndicate, has ben in the district fort he pas week, making arangements for starting drilling opertations

The company has purchased a drilling outfit from C. E. Duffield, of Redcliff, and this equipment is now being moved to the scen of operations as rapidly as possible.

Facilities are under arrangement to carry the hole down to a depth of 3,000 fet, if necessary, and the first casing will be 20 inches in diameter. Smalles sizes will be used as the various gas-bearing stratas are reached and Mr. Pearson expects to strike a great many heavy flews as the dilling proceeds. Great faith in this field has been expressed, and the Ontario-Albertasyndicate is in a position to go far in development.

The lease holdings, as it happens, are bisected by the Canadian National Railway's right-of-way, and as an oil strike would insure the early completion of the Hanna-Redcliff branch of the system, the development work will be followed with close interest by towns and country people of this district.

ST. MARY'S CHURCH GIRLS TO HAVE SOCIAL EVENING

The girls of St, Mary's church are puting on a whist drive and dance in Cliff Hall on Easter Monday evenig, April 9th. Whist wil commece at 8 o'clock promply. Lauder's four piece orchestra will supply the music for the dace. Refreshments will be served during the evenig. Admision $2 a couple, exra ladies 35c. All are invited. A real good time is asured.

GORDON MEMORIAL NOTES

Pre Easter services wil be held each evening except Saturday during the passion week. On Tuesday and Thursday evenings we expect visiting speakers from the city. On Friday evening new members will be received

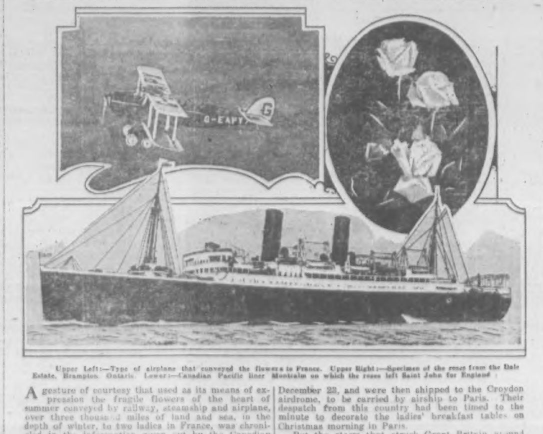

The sacriment of the Lord's supper will be celebrated on Easter Sunday at the morning serrvice,

The girls' concert, which will include a humorous play entitled "The Wrong Baby," will be given on Tuesday evening, April 10th.

ATTACKS FARMERS WHO DON'T JOIN THE POOL

A bitter attack on farmers who have refused to join the Wheat Pool, was made over the radio Friday night by L. D. Nesbitt, publicity director of the Alberta Wheat Pool when he charged that non-pool garmers were purely self centred in seeking to reap the benefits which he claimed the pool brought through icreased prices and yet were unprepared to pay for them through membership in the Wheat Pool.

Canadian Roses for Paris Ladies

Upper Left:—Type of airplane that conveyed the flowers to France. Upper Right:—Specimen of the roses from the Dale Estate, Brampton, Ontario. Lower:—Canadian Pacific liner Montcalm on which the roses left Saint John for England

A gesture of courtesy that used as its means of expression the fragile flowers of the heart of summer conveyed by railway, steamship and airplane, over three thousand miles of land and sea, in the depth of winter, to two ladies in France, was chronicled in the information given out by the Canadian Pacific Express Company

The flowers were two boxes of roses, grown in the huge greenhouses of the Dale Estate, Brampton, Ontario, and sent by Lieutenant-Colonel J. B. Maclean, president of the Maclean Publishing Company, of Toronto, to Princess Carolyn de Faucigny-Lucinge, who was a patient in the American Hospital in Paris, and to the Countess Odon de Lubersac. They were sent as a Christmas present to those ladies, but the weather intervened, and they did not reach their destination until some three days' later. When they did reach their objectives, however, it was found that they were as fragrant and fresh as if they had been plucked a few minutes earlier from their bushes

The Canadian Pacific Express Company was responsible for the handling of the roses from Brampton via Saint John and overseas on board the SS "Montcalm" to Liverpool. They arrived at the latter city December 23, and were then shipped to the Croydon airdrome, to be carried by airship to Paris. Their despatch from this country had been timed to the minute to decorate the ladies' breakfast tables on Christmas morning in Paris.

But the storm that struck Great Britain around the Christmas season had a say in the matter. The airdrome was snowed under, and it was found impossible to send out an airship. The roses were held up and did not finally reach Paris until December 28, when they were delivered promptly. The disappointment was more to the sender and the express company who had strained every resource to get the flowers to their destination on time and who were only defeated by weather that was unprecedented in Great Britain, and that could not be foreseen and guarded against. What the recipients' reactions to the gifts were, are not chronicled, but it is fairly sure that they were delighted with these Canadian flowers from a Canadian gentleman, and impressed by the tour de force of their despatch, which disproved the words of their great national poet, who mourns in one of his best-known poems that the rose "endures but the space of a morning."

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is the best tea you can buy

The Water Powers Of Canada

In the "forward look" which is now almost universally characteristic of the Canadian people regarding their Dominion, and which offers such a sharp contrast to the less optimistic,—in fact the rather pessimistic,—view entertained a comparatively few short years ago, the subject of power, and power development schemes, looms very large, coupled with the question of improved and cheaper means of transportation which has always bulked largely in the national policies of the country.

The development of power through the generation and application of steam made the nineteenth century noteworthy, and introduced the age of machinery in the work of production as contrasted with the old methods of handwork and manual labor. The closing years of the last century saw the beginnings of the development of power through electrical energy, largely developed through the primary utilization of steam. The internal combustion gasoline and oil engines also had their beginning.

During the first quarter of the present century development of electrical energy, and of internal combustion engines, proceeded with amazing rapidity, particular attention being paid to the harnessing of water-powers throughout the world for the production of electrical energy in its cheapest form and in enormous quantities, until it is now recognized that those countries possessing ample water-powers, and those natural resources that are the basic requirements in manufactures, are, and will to an ever increasing extent be, the great industrial nations of the world.

In extent, variety, and wealth of natural resources required in manufactures, and in the magnitude of its available water-powers within reasonable distance of such resources, Canada is probably the richest country in the known world, and the development of its water-powers for use, and the consequent utilization of its natural resources, is going ahead by leaps and bounds. The value of these water-powers and resources are only beginning to be fully realized by the people as a whole, and what they may be made to mean in the future of the Dominion.

Men of wealth, captains of industry, financial magnates, are alive to the importance of these great sources of potential wealth. They realize they are the foundations upon which great enterprises and an abounding prosperity can be built. As a result a scramble, a struggle, for possession and control of water-powers is in progress, and it behooves the people of Canada to give close attention and deep study to the many issues involved.

Naturally two schools of thought have arisen as to the policy which should be followed in relation to possession, development and control of water-powers, one advocating retention by the Government, whether Federal or Provincial, and development and ownership by such authority as a matter of public policy; the other strongly urging private ownership, development and control. It is argued, probably with truth, that development will be more rapid through the investment of private capital than can possibly be expected if left solely to Governments. It is further argued that, through the retention of a large measure of Government control over operations and rates, the interests of the public and the country at large can be protected.

Advocates of complete Government ownership, on the other hand, contend that these water-powers are the property of and an asset to the whole country, and should not be alienated; that these water-powers will run on forever and not be dissipated or exhausted as other resources may be; that, even granting that development might be more rapid under private ownership and greater initiative shown through the investment of private capital, the Canadian people will be well advised to take the longer look into the future of their country and protect that future by retaining complete possession and direct control of these sources of industrial greatness and national wealth and prosperity.

Ontario is practically committed to the policy of public ownership; Quebec, on the other hand, has followed the policy of development through private investment. Manitoba has both public and private development schemes under way. Saskatchewan has a Power Commission studying the whole subject. Manitoba and Alberta are both striving to obtain control of certain water-powers, title to which now rests with the Federal authorities. And looming over all is the great issue of development and control of the huge powers along the St. Lawrence and Ottawa Rivers.

This whole subject is so vitally important to the future of Canada it is well that all citizens should give earnest and careful consideration to it, and not be stampeded by private interests or by political catch-cries into either approval or condemnation of any policy now presented until it has been most thoroughly examined and demonstrated to be sound and wise, or, on the other hand, inimical to the country's best interests.

Manitoba Old Age Pensions

Monies To Be Raised By Special Levy On Property

Monies for the payment of the old age pensions will be raised by a special levy on property in the province, based on the equalized assessment. Premier John Bracken told the Manitoba Legislature, when introducing the bill. One half of the total amount necessary to finance the scheme will be paid by the Dominion Government, but the province will have to pay the other half, and in addition will have to bear the cost of administration, which will be placed in the hands of the Workmen's Compensation Board.

LESSON No. 17

Question: Why is *emulsified cod-liver oil so efficient* a food for young children?

Answer: Rickets or weak bones are evidences of lime-deficiency. Emulsified vitamin-rich cod-liver oil *helps Nature* supply this deficiency.

Pure, pleasantly flavored, nothing quite surpasses

SCOTT'S EMULSION

W. N. U. 1722

Advocates Film Censure

Member Of Ontario Legislature Wants Films Specially Censored For Children

Aurelian Belanger has given notice of his bill to amend the Theatres and Cinematographs Act, as indicated when he was addressing the Ontario legislature recently. It proposes appointment to the board of censors of a man whose duty it would be to revise films from the standpoint of their effect upon children. Approved films would be stamped to indicate that they may be exhibited to children under 16. Those not so approved would not be permitted to be shown children, even when they are accompanied by parents or guardians.

Record In Miniature Writing

Writing in miniature on threepenny pieces is the hobby of a Harrow engraver. He has just completed engraving the Lord's Prayer twelve times on one of the small coins. And there is still room for three more versions! He thus beats the record of a Southampton man, who succeeded in writing the Lord's Prayer 11 and two-thirds times in a space the size of a threepenny piece.

Keep Minard's in the Medicine Chest.

Tribute To Sun Life President

Mr. T. B. Macauley, president of the Sun Life Assurance Co., who recently celebrated his fiftieth year of continuous service.

Extraordinary Expansion Of Sun Life Assurance

Business Has Doubled On An Average Every Five Or Six Years

The extraordinary expansion of the Sun Life Assurance Company of Canada during the last few years has caused its annual report to be awaited with unusual interest, not only by the policyholders of the Company, but by a large section of the general public.

Perhaps a sentimental interest attached to this expectation this year, because the President, Mr. T. B. Macaulay, in October celebrated his fiftieth year of continuous service, and it was known that the world-wide organization of the Sun Life Company had determined to specially honor his jubilee with an outstanding tribute in the form of increased business.

Having in view the fact that the Company's business has doubled on an average every five or six years since it was organized, it would appear rather difficult to outdo previous records. But the annual report which the President has just submitted, and which appears in this issue, must have surpassed the expectations of the most sanguine. The total amount of assurances in force with the Company now approaches the billion and a half figure, $1,487,000,000, an increase for the year of over $231,500,000. The total net income for the year exceeded $100,000,000—five times what it was ten years ago, and more than $23,000,000 in excess of the income for the previous year.

The outstanding position of the Sun Life Company in the assurance world is not confined to Canada. Such statistics as are available for 1927 indicate that the aggregate new business of all the companies operating in North America last year barely exceeds the total new business of the previous year. The increase in the new business of the Sun Life of Canada, on the other hand, was twenty-three per cent. Assurances in force on the books of the Company have doubled in four years—new business has trebled in that period.

This wonderful expansion has been paralleled by a great increase in the already proverbial strength and resources of the Company. The assets have been increased by over $56,000,000, and now reach the impressive total of over $400,000,000. The Company's assets approximate the amount of the total assurances in force only eight years ago.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Canadian Coal Industry

The number of men employed in the coal industry of Canada last year was 29,004, divided between 6.611 surface men and 22,393 under ground. Nova Scotia mines employed 13,402 persons; Alberta, 9,469, and British Columbia, 4,903. Saskatchewan had 648 and New Brunswick, 582.

True love will conquer a great many obstacles, but poverty and the toothache are exceptions.

Nursing Record In Two Continents Hard to Equal

Nurse Waite of New Brighton writes: "While nursing in New York, in my early twenties, I was poisoned by food, my sister nurse recommended your wonderful Vegetable Laxative Pills.

"I am never without them and have prescribed them for thousands of my patients who were suffering with indigestion, gas and sour stomach, biliousness, sick headache and indigestion caused by constipation poisoning."

CARTER'S LITTLE LIVER PILLS
All druggists—25c and 75c red pkgs.

Sore throats

Rub Vicks on throat and chest. Relieves two ways at once—absorbed, inhaled.

VICKS VAPORUB

OVER 21 MILLION JARS USED YEARLY

ORIGIN OF TERM "ORANGE PEKOE"

Thousands of people every day read of and ask for "Orange Pekoe" tea, yet rarely know what this term means. Mr. Spalding Black, of the Salada Tea Co., gives the following information on the subject:

"At one time China produced practically all the tea used in the world. There the tip leaves of the tea bush looked silvery in color and when cured were wiry in shape. These tip leaves were called by the Chinese "pak-ho" (meaning silver hair). In the latter part of the nineteenth century, when tea growing had spread extensively to Ceylon and India, tea growers discovered that the color of the tip leaves on the Ceylon and Indian tea bushes was changed by the climate to a slightly more orange shade, so the Ceylon and Indian tip leaves came to be called "Orange Pak-ho." This was soon Anglicized to the term we now have—"Orange Pekoe," which should be pronounced "Peek-o."

The ordinary buyer of tea, when asking for "Orange Pekoe" expects to receive a Ceylon or Indian Black Tea. However, there are so many qualities of "Orange Pekoe" offered to the public, and frequently at bargain prices, that a word of warning is necessary.

Everyone is familiar with the merchant who has perishable fruit and who sells for very low prices the last of the shipment which has lost its freshness, which the merchant wants to be rid of to avoid loss. The same thing applies to tea, which also is very perishable if exposed to the air. When you see cheap tea, it is either very poor quality or else it has lost its freshness and most of its strength, whether this tea is called "Orange Pekoe" or not.

In this age of well-edited newspapers, radios, automobiles and fast trains, accurate knowledge on a great host of subjects is transmitted rapidly. The advance of science has nowhere been more valuable to mankind, except perhaps in preventive medicine, than in the means of protecting the purity and goodness of food stuffs.

Today, in accord with enlightened knowledge, the best tea is always sold in sealed air-tight packages, preserving it from deterioration in flavor and contamination from any outside source. Canadian tea-drinkers are today getting better and purer tea than ever before. The sales of well-blended and carefully packed package teas are constantly increasing as a result of the purity and superiority of these teas being advertised to the public."

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Most Competent Air Pilot

Colonel Lindbergh Can Easily Qualify For This Title

At Havana Colonel Lindbergh completes his program of Latin American visits. Twelve independent nations, a British colony, two insular possessions of the United States and the Panama Canal Zone have been visited by him since December 13, when he rose from Bolling Field in Washington under weather conditions that to many seemed inauspicious, but which to his trained intelligence were propitious. Each trip was a pioneer voyage. Lindbergh's maps were necessarily makeshift affairs for he blazed the trail over uncharted wildernesses, seeing what no man ever saw before, solving problems never before faced. He sailed near sea level, at high altitudes, in weather fair and weather foul. He kept his schedule as a railway president might hope to have a train keep its schedule.

It is all very extraordinary in aviation as at present developed. It is also very fascinating. But above all it silences those inevitable ones who are inclined to say that every great feat, like the flight from New York to Paris, is "luck." The conviction is nearly universal that Colonel Charles A. Lindbergh, formerly of the United States Air Mail Service, is about the most competent pilot in the world.

One or two drops of tincture of iodine will vanquish germs in a quart of unsafe water within 20 to 30 minutes.

A Prime Dressing For Wounds. — In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Will Shelton, chief of the Snohomish tribe of Indians, is carving his tribe's history on a huge cedar pole.

Sawgrass, a tall grass that grows in marshy places in Florida, is used for making paper pulp.

Minard's Liniment—Invaluable in the Stable.

Scheme For Aerial Signs

Principal European Cities To See Signals Flashed From Air

Giant equipped aeroplanes and rigid airships of new designs are soon to be employed in organized schemes for flashing aerial night signs above the principal cities of Europe.

One project nearing completion is for a powerful multi-engined night-flying plane with a device underneath its widespread wing which will permit huge gleaming letters to be spelt out by an operator as the machine rushes through the darkness.

Another plan in active preparation is for a super-giant ingeniously equipped airship to be stationed permanently in a big shed at Friedrichshafen, and to set off on long distance flights during which it will appear suddenly in the night sky above one great city after another.

On either side of the monster's hull will be immensely long frames containing countless electric light bulbs of various colors. As the machine sails majestically above a densely populated area, electricians in a chamber within its keel will tap keys and cause great letters to flash out along the airship's sides, spelling words which will be seen by the throng gazing up.

Yet another plan being worked upon is for a series of pilotless air machines of a perfect type, wirelessly controlled to be sent up on night flights.

These manless craft, emitting a luminous smoke stream, would go up and repeat automatically a series of prearranged evolutions which would form easily seen letters at great heights in the darkness.

Birds In Northern Canada

According to explorers of the Topographical Survey of the Department of the Interior, the predominant bird note of the Northern woodlands of Canada, in the latitude of Great Slave Lake, is that of the white-throated sparrow, while the plains to the North of this wooded area are always associated with the plaintive song of the Lapland Longspur. This friendly little bird is always about camp and follows the traveller on his journey.

Muscular Rheumatism Subdued. — When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Eclectric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Life's greatest illusion is that money brings contentment and felicity. Nothing of the kind. It brings responsibilities and worries.

Save 50% on Your PLANT BILL

Why pay agents double prices for trees, shrubs and plants? Buy Canadian-grown stock direct from us and save agent's commissions. We handle only high grade stock, guaranteed true-to-name. Our packing and shipping facilities are unexcelled—customers everywhere endorse our money-saving sales methods. All standard varieties of fruits, berries, shrubs, ornamental trees, bulbs, etc., fully described in our large complete catalogue, with explicit planting directions. You'll save money and get better results with our stock. Send today for catalog—it's FREE.

Loganberry Wine

In 1927 some 90,000 gallons of loganberry wine were manufactured in British Columbia, as against 25,000 gallons in 1924, according to S. G. Coventry in the Provincial Legislature, urging the local sale of the wines to further expand the industry.

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very bady with my heart and nerves, the cause of it, I think, was my going through the change of life.

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well.

"I was advised to try MILBURN'S HEART AND NERVE PILLS so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

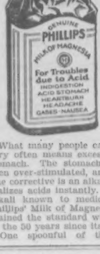

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Was a Fast Worker

With lightning speed a "cat" burglar ransacked a room in an Esher Hotel and escaped with jewellery worth £250. In three minutes the thief climbed through a second-floor window; ransacked a wardrobe, portmanteau and a chest of drawers, and escaped down the stackpipe.

At Grun, Germany, in the same parallel of latitude as Newfoundland, are the most northern vineyards in the world.

Many a man who is fancy free does not fancy his freedom.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

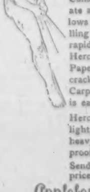

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

Russia has filed with the League of Nations, a proposal for the abolition of all armaments, in line with the suggestion she made at the December League disarmament meeting.

The Royal Society of Canada will holds its annual meeting in Winnipeg, May 23-26, it was announced by President Prof. A. H. R. Buller. This is the first time the society has convened west of the Great Lakes.

Herbert Swanston, 52, pioneer farmer, four miles north of Welwyn, Sask., was instantly killed about half a mile from the town when a sleigh load of wheat tipped over him and smothered him.

The complete stamping out of leprosy within the next decade is predicted in the annual report of the British Leprosy Relief Association, by means of a treatment with oil extracted from the dried fruit of the hydnocalpus tree.

Failure to meet the right man is the chief cause of spinsterhood among educated women, says Dr. Katherine Dement Davis, for ten years secretary of the New York bureau of social hygiene. She has just completed a survey of the situation.

Unemployed insurance, national in scope, is recommended in a report submitted to the provincial legislature by the Seasonal Unemployment Commission, headed by Dr. R. W. Murchie, of the Manitoba Agricultural College.

Attempts of the tri-motored Zenith aeroplane Albatross to create a new endurance world flight record was unsuccessful. The machine, piloted by A. Peterson and C. F. Rocheville, was forced down at the end of 26 hours owing to motor trouble.

The following appointments in the Royal Canadian Naval Services have been approved, it was announced by the department of national defence: E. P. Shaver, Edmonton, confirmed in the rank of sub-lieutenant, and G. A. Agnew, Saskatoon, confirmed in the rank of sub-lieutenant.

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water. They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed free from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Report Against Gland Treatment Of Livestock Is Given

A committee of experts appointed by the board of agriculture, of London, Eng., has issued an adverse report on Dr. Serge Voranoff's gland treatment of livestock. The report admits that the claim is possibly justified, that the effect of the treatment was rejuvenation of aged and decrepit male sheep and similar animals, but considers the evidence was not based on critical experimentation, and that, therefore, the data given fails to warrant an estimate of economic value.

One-fifth of the United States is covered by forests.

Women Of S. A. Want Franchise

A bill providing for the extension of the franchise to women in South Africa has passed the committee stage in the house of assembly, despite strenuous opposition from the Nationalist party, led by Premier J. B. M. Hertzog. The premier takes the ground that the question as to rights of the natives should be settled first. The Women's Enfranchisement Bill limits the granting of the vote to white women.

"It doesn't matter; I can come back," he said. "There's probably a train that comes back."

"I'm sorry!" said Icky. "I've made you miss your train!"

Made Fatal Voyage

Six Japs Are Suffocated In Hold Of Ship In Attempt To Enter U.S.

The bodies of six Japanese who attempted to smuggle themselves into the United States were found in the hold of the Tasiko Maru, which reached Tokio from Seattle, Washington. The ship's cook confessed to hiding them in the hold on December 20 when the Tasiko Maru sailed for Seattle. From brief notes the men left it was believed they suffocated before the ship left Yokohama after which the cook became frightened and kept their death secret until the ship returned to Japan.

EXPERT MOVERS

Sir John and Lady Martin-Harvey, famous English players of Sabatini's "Scaramouche," who with their company of 25 actors spent only three hours entraining at Halifax from the Cunarder Antonia for their Canadian tour, with hundreds of pounds of dresses, disguises, guns, and what-not to be piled in two 65-foot box cars. No fuss no time lost. A lesson, to householders who move in May.

Great Future For Canada

British Editor Predicts Dominion Will Bcome One Of the Greatest Powers

It is always interesting for an individual or a country to see himself or itself through the eyes of another, particularly of strangers. Last summer a number of outstanding British journalists visited Canada and toured the Dominion from coast to coast. Since returning to their own country they have been giving the readers of the various papers they control the benefit of their impartial impressions and conclusions regarding this country. One of these visitors was Sir James Owen of The Exeter Times. In an article in that paper he states that the estimate of Canadian cities he had formed previous to his visit last year was entirely wrong. He had expected to find the cities of Canada Americanized in their thought, character and outlook. Instead of that he finds them "essentially Canadian, looking ever north and east and west for their development and wealth, not south."

Sir James Owen recognizes that there is a strong pull from the United States felt in Canada, and but for the deeply ingrained national pride of the Dominion this attraction from the south, he feels, would not have been overcome. Of the future he says: "Twenty years, thirty, forty years hence—years are nothing in the life of a nation—Canada will become in reality what she is potentially today, one of the greatest powers of the world—territorial, economic, industrial."

Here is one visitor at least who has formed an estimate of Canada's resources and potentialities that Canadians believe is in accordance with facts. The Imperial tie, Sir James Owen thinks, will also grow stronger through the coming years. His judgment in this respect is again correct.—Toronto Globe.

For Fattening Hogs

Recleaned Elevator Screenings Are Found To Have a High Feeding Value

A series of tests have been made at several of the Dominion Agricultural Experimental Stations to ascertain the value of recleaned elevator screenings as a feed for hogs. These recleaned screenings are described in a new Dominion Department of Agriculture pamphlet on "Screenings as a Feed For Live Stock," as containing about 50 to 70 per cent. of wild buckwheat, 20 to 40 per cent. broken or shrunken wheat, some wild oats, and not over 3 per cent. of small weed seeds.

One experiment conducted at the Central Farm at Ottawa, showed that finely ground recleaned screenings had a high feeding value for hogs. They were very much better than screenings not recleaned. In tests at the Brandon Farm the recleaned elevator screenings gave more rapid gains in fattening hogs and a lower feed consumption per pound of gain than did barley. In experiments at the Lennoxville Station, the recleaned screenings, when fed alone, compared favorably with mixed meal and with barley rations. They gave still better results, however, when fed in mixtures. Tests at other experimental stations have given similar results.

In all the tests made at the various stations recleaned elevator screenings showed a high feeding value, comparing favorably with good meal mixtures and with single feeds as barley, corn and oats. Unusually high rates of gain were made with the hogs fed screenings, these being exceeded only by lots fed on good meal mixtures. In all cases the screenings were finely ground. The pamphlet may be obtained from the Publications Branch, Department of Agriculture ,Ottawa.

A miser is a great lover of generosity in everybody but himself.

"My nerves are so bad that I have not been able to close my eyes for a week. What do you recommend?"

"Boxing. After my first lesson I couldn't open my eyes for a week."—Lustige Kolner Zeitung, Cologne.

W. N. U. 1722

Value Of Alberta Farm Production

1927 Crop the Largest In the History Of the Province

Value of farm production of all kinds in the province of Alberta in 1927 reached a grand total of $330,143,152, far and away the biggest in the history of the province and just about 26 times the value of farm products in 1906. The acreage under crop last year, exclusive of summerfallow and new breaking was 10,981,270 acres, or 22 times the 1906 total.

Included in the sum total of the province's agricultural production in 1927 were field, root and fodder crops to the value of $272,891,152; dairy products $20,750,000; miscellaneous $36,502,000.

Two of the comparatively new lines of production that give considerable promise for the future are honey and beet sugar.

The production in all lines last year averaged $4,385 per farm in Alberta, which is a thousand dollars better than 1926.

The wheat crop alone brought $46,000,000 of new wealth in 1927 in excess of the previous most valuable crop, which was that of 1920. Last year's crop was worth three times that of 1916 and almost twice that of 1923.

The value of livestock in Alberta has reached a total of $106,000,000, almost four times the figures of 1926.

Heavy Export Trade

Alberta Exported Goods To U.S. To Value Of Over Nine Million Dollars In 1927

The Province of Alberta exported goods to the value of $9,120,305 to the United States during the year 1927, according to the annual report of S. C. Reat, United States Consul for Calgary district. The total exports show an increase of $764,660 or 17 per cent. over 1926. Cattle and hogs held a conspicuous place in these exports, the former amounting to $1,215,686 and the latter to $982,045.

Voice (on telephone): "Will you tell the doctor to come at once—my little girl has swallowed a needle."

Maid: "The doctor is busy, do you need the needle at once?"

"Maizie" Most Profitable Hen

Famous White Leghorn Hen Is a Revenue Producer

"Maizie" the famous white Leghorn hen owned by the University of British Columbia farm, officially known as Hen No. 6, the world's champion layer with 351 eggs in a year, is proving a substantial revenue producer for the University of British Columbia.

Last year the sale of pedigreed poultry stock originating from "Maizie" returned to the University $2,225. Two cockerels of hers shipped to a poultry raiser in Ohio fetched $500 each. Another cockerel was sold in New Jersey for $300. Two other cockerels were disposed of at $150 each and two pullets at $100 each. Proceeds from seventeen hatching eggs were $425.

The University receipts on sale of pedigreed British Columbia stock totalled $7,225 for the year. This sum included the proceeds from the sale of Hen F319, a 335-egg registered hen, which fetched $500. Sale of twelve of her offspring brought the total amount realized from this bird to $1,350.

"Maizie" still graces the University pen, despite the fact that $1,000 was offered for her last year and $3,000 for the pen of which she is a member. It has become quite evident since the world's poultry congress, held in Ottawa in August, 1927, that the University of British Columbia could have disposed of many more birds at very satisfactory prices if it had them to spare.

Long Distance Phone Record

The San Francisco Examiner reported a telephone conversation between Carl Raiss, San Francisco broker, and George Lust, Berlin banker, as the greatest distance connection ever completed. Each in his home city, Raiss and Lust were able to converse over 6,000 intervening miles with no difficulty. They talked 11 minutes and the call cost $360.

Statistics show that the average British woman now is 5 feet, 2 inches tall, has a "pull" of 183 pounds and a grip of 58 pounds.

Growth Of Life Insurance

United States and Canada Lead All Other Countries

Only the United States exceeds Canada among the countries of the world in the per capita amount of life insurance carried by the people. The total sum of insurance in force in Canada in 1927 was $5,400,000,000, an increase of $450,000,000 over 1926, representing a per capita insurance of over $540. In the United States the amount of life insurance carried per head of population is placed at over $600.

In the past ten years the increase in the amount of life insurance taken out by the people of Canada constitutes a world's record, according to the calculations of actuaries. It is an interesting fact that no one has ever lost a cent as a result of the failure of a Canadian life insurance company, which is due to the government supervision over such companies for the protection of policy holders.

Nearly $300,000,000 is being paid annually by Canadians in life insurance premiums. There is probably no better index of the prosperity of the people.

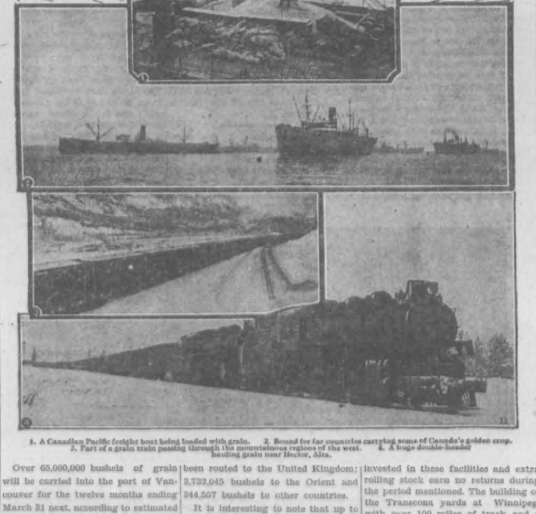

When To Irrigate the Alfalfa Crop

One Good Irrigation For Each Cutting All That Is Needed

At the Lethbridge, Alberta Experimental Station, data on the irrigation of alfalfa have been collected for the last four years. It has been found that an irrigation in the fall or early in May gives a good first crop and another irrigation when the crop is about 12 inches high further increases the yield. Where the first application in the spring was made when the crop was 12 inches high the average yield was decreased one ton per acre as compared to a fall or early spring irrigation. For the second crop, an irrigation applied a few days before or immediately after the first crop was harvested gave a satisfactory return. On the whole, except in special cases such as unusually dry seasons or on certain soils, one good irrigation for each cutting will give satisfactory results.

The United States admitted 805,228 immigrants in 1921.

65,000,000 Bushels of Grain Move West

1. A Canadian Pacific freight boat being loaded with grain. 2. Bound for far countries carrying some of Canada's golden crop. 3. Part of a grain train passing through the mountainous regions of the west. 4. A huge double-header hauling grain near Hector, Alta.

Over 65,000,000 bushels of grain will be carried into the port of Vancouver for the twelve months ending March 31 next, according to estimated figures issued from the offices of E. D. Cotterell, Winnipeg, Man., superintendent of transportation for the western lines of the Canadian Pacific Railway.

These figures will establish a record. In fact they show enormous strides since 1922—the first year that the Canadian Pacific Railway handled any quantity of grain to the western coast.

Up to and including January 21 of the present year, a total of 32,833,573 bushels have been shipped by boat from the port of Vancouver. Of this amount 28,756,980 bushels have been routed to the United Kingdom; 3,732,045 bushels to the Orient and 344,557 bushels to other countries.

It is interesting to note that up to January 21, the Canadian Pacific railway loaded on western lines this season 125,451 cars of grains of all kinds. If placed end to end this vast collection of cars would stretch approximately 1,170 miles and a train, travelling at the fast rate of 60 miles an hour, would take nearly twenty hours to pass them.

Very few people know that the very extensive and expensive facilities provided by the Canadian Pacific Railway to handle the annual grain crop on western lines remain idle, comparatively speaking, for about two-thirds of the year, and the money invested in these facilities and extra rolling stock earn no returns during the period mentioned. The building of the Transcona yards at Winnipeg, with over 100 miles of track and a capacity of 12,000 cars, one of the most up-to-date yards on the continent, was necessary to handle the Canadian Pacific's grain traffic, and is therefore used for handling revenue traffic only about two-thirds of the year.

During the time the cars and locomotives are lying idle they are inspected thoroughly by the mechanical department and put into first class shape, so that when the rush commences they are ready for immediate use. This year seventy of the company's largest engines were transferred west for the grain haulage.

ANTIQUITIES OF THE FUTURE

Preserving the Ordinary Things Of Today For the Benefit Of Later Generations

In his comments on the letters of the English poet, Cowper, Goldwin Smith makes the observation that it is more difficult to secure the antiquities of the generation preceding ours than it is to acquire those of remote ages. It is almost as easy, he writes, to get a personal memento of Priam or Nimrod as it is to get a spinning-wheel or a tinder-box, and while an Egyptian wig is attainable, a wig of the Georgian era is very scarce. To put it in other words, although we attach great value to the relics of a remote past, each generation fails to realize that the ordinary things of its own day will be intensely fascinating to the people of the future.

It seems, too, that the things of everyday life do more towards making past generations live for us than mighty monuments or the records of great historical events. A child's toy is more poignant than the pyramids and the deer-horn pick of some neolithic workman spells more to us than the ruins of Stonehenge.

Yet these ordinary things are just those which no one thinks of preserving. They are, we imagine, too commonplace for that. We forget that to the people of a hundred years hence the ordinary things we do and the commonplace objects of our daily life will make us live again more vividly than a hundred Hansards or a thousand histories of the Great War. If a man of today were to keep a diary like that of Pepys, in which a myriad trivial incidents are set down, posterity would not find it trivial; nor would it find the ordinary things described commonplace.

Pepys' diary is one illustration of the extraordinary value which a detailed record of the average life of a person is to future generations. Another is the Elizabethan school book which was discovered a short time ago. In it was set down the things which the child who owned the book had to do each day. As a result across the years we can see a picture of the daily life of an Elizabethan youngster, something which is more vivd than the voyages of Drake or the defeat of the Spanish Armada. What is true of these instances would be equally true of some similar account of the life of today. We need museums not only for the antiquities of the past but for those things which will be the antiquities of the future.—Edmonton Journal.

Canada For the Young

Wonderful Possibilities On Western Farms For Those Willing To Work

It would be useless and inhuman to despatch shiploads of men to Canada if, when they arrived, there were no work for them to do and no houses to shelter them. The process of transferring our surplus population to the Dominion must be a gradual one. Canada needs especially to catch her future citizens when young. Nothing could be more praiseworthy than the work of those agencies which are sending British children to Canadian rural homes and British public school boys to be trained on Western farms. For the young, indeed, Canada has illimitable possibilities. The Prince of Wales can appeal especially to them from his own experience of Canadian life. His example has already fired many a British boy with the desire to make his future home in Canada, where anyone who cares to work can do well.

The Things Unseen

It is the things unseen that are most availing for the healing of the nations and minister most to a mind diseased. It is things unseen that conduce to growth and to the silent upbuilding of the soul. Both in their impact upon man and in their reflection from him, it is unseen things that are most potent. Influences that no one can discern as either burning or shining, radiations which are not explicit, still less tangible, these powers in the ultra-red and ultraviolet regions of the spirit are strong beyond the telling.

Form Sight Saving Class

The Vancouver School Board's first sight-saving class has just been established. Mrs. A. M. Cleverley, of Toronto, who has taught sight-saving classes in various parts of the Dominion, will have charge. Sight conservation classes use text books typographically suitable for persons with poor vision.

No man has to serve an apprenticeship in order to learn how to make mistakes.

An organ in the Philippine Islands has furnished music for more than 100 years.

Predicts Billion Bushel Crop

Almost Unlimited Possibilities Of Wheat Growing In Western Canada

Eventually Canada will produce a billion bushel crop of wheat annually and will have no difficulty in finding a market for it, predicted Hon. T. A. Crerar, president and general manager of the United Grain Growers Ltd., former Federal Minister of Agriculture for Canada, in a recent address at Port Arthur. The annual crop of wheat produced in the Dominion is now close to half a million bushels. Last year it was over 440,000,000 bushels.

Referring to the devolpment of Western Canada, Hon. Mr. Crerar said there was no country in the world where so great a development had taken place in the past forty years as in the Canadian West, and there was no country which had so great potentialities. Speaking of the export of grain, he said that the Dominion was exporting wheat to every country of Europe, also to the Orient, and declared that with the population of Europe growing at the rate of 2,500,000 every year it would be an ever-growing market for the product of Canadian farms.

Canada is admirably located to furnish these supplies, he pointed out. The United States with its population of nearly 115,000,000, and growing at the rate of from 1,500,000 to 2,000,000 every year, would soon cease to be a food exporting nation, as it was already importing foodstucs in increasing quantities from Canada, such as dairy and other products.

Making Fountain Pens

Splitting the Nibs Is Most Particular Part Of Work

A visit to a factory where fountain pens are made will prove both instructive and fascinating. There, says a writer in Tit Bits, you will see long sheets of vulcanite, flattened sheets of burnished gold, and tiny specks of osmiridium or other alloys used for pointing pens, all of which are being transformed in an incredibly short space of time into the finished article.

The works are divided into two main parts—the vulcanite shop and the gold shop. In the latter the nibs are cut out of flat sheets of gold with a steel die and passed over to the tipping experts. Tipping or "pointing," as it is known to the trade, is the welding on of tiny pellets of osmiridium, or other "pointing" alloys to the tops of the nibs to precent them from wearing away.

After the points have been welded, the nibs pass through various processes, being stamped with the maker's name, tempered, curved to the right shape ,and polished. Finally, the nibs are slit on a whirling copper disc. This disc is exceedingly soft, but such is the revolving speed it cuts through the osmiridium. It needs a very highly specialized expert to handle this machine, for a slip of a thousandth of an inch would ruin the nib.

In the vulcanite ship long sticks of hardened rubber are hollowed out with delicate lathes and converted into the barrels of the pens. After the nibs have been fitted on, the finished article is filled with ink and fastened with clamps to an "ink-slinger." This is a revolving machine which whirls the pen at such a terrific speed that it dashes the ink out in streams should there be the tiniest leak.

Oil In Lesser Slave Lake Area

A. P. Phillips, field manager for the International Oils Alberta, Limited, recently stated that the result of the company's drilling last year in the Lesser Slave Lake area gave very satisfactory results, and produced a heavy gas flow and also good indications of oil. This company holds some 36,000 acres in the area and intends to start operations again early in the spring.

A recently invented electric scrubbing machine saves time and labor.

"Miss Fohl is very fond of animals!"

"Good. Then there is hope for me. Yesterday she called me an ass!"—Vikingen, Oslo.

Has Many Underground Rooms

250,000 In London County Have Ceilings At Street Level

A recent census in one London borough alone reveals the existence of 7,000 basement rooms, of which 1,500 have ceilings at street level and are death-traps, therefore, if floods come. It is estimated that there are 250,000 basement rooms in the County of London.

Of course, not all are used as sleeping apartments, but the majority are habitations for day use and are let to people who cannot yet find other homes. One can scarcely call this condition of things "shameful." It is an unwholesome legacy of the war, and borough authorities, in sheer mercy, are compelled to turn a blind eye to the law until arrears of building, particularly of workmen's dwellings, have been wiped out. They cannot turn the people into the street.

Why is Red Rose Tea so fresh and flavory? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued

The Englishman stretched out his arms dramatically. His voice quivered like a violin string. "The British Empire is my country," he said; "I was born beneath the British flag, and so were my people for generations back. I love it. The British Empire is in trouble and has called. I do not reason, I go. It's like your mother calling—would you wait to question if your mother called? If you knew your mother was attacked by a bully would you hang back to see first if she had been to blame in any way—would you? My mother couldn't be wrong—not to me. That's what I mean."

Helmi was coming in from the kitchen with the dessert on her big tray. She paused, arrested by the strange voice speaking with such terrible earnestness.

Bill Larsen had not stopped eating. Empires might rise or fall, but Bill believed in getting his "vittles" while they were hot. "Well no," he said, "I can't say as I feel that way toward any country. It's a case of show me—I'm from Missouri, first, last and all the time."

Helmi watched the Englishman's face. He was staring helplessly at the complacent big giant before him, who serenely buttered a slice of bread on his broad palm as he spoke.

"I ain't so fussy over your old British Empire, anyway," added Bill; "I don't know but I'd just as soon see Germany win."

Arthur Warner, walked over to where Bill sat. His face was white and his eyes very dark. Helmi knew just what was going to happen.

"You cannot insult my country in my presence," he said quietly, and slapped the Swede's face with his open hand.

With a hoarse oath Bill sprang from the table.

Helmi screamed and darted forward, but the Swede's closed fist had already landed with smashing force on the Englishman's face, sending him reeling to the floor.

It was Helmi who was first beside him. "Oh, you big stiff, Bill Larsen," she cried, indignantly, "he only gave you a little slap, but you smash at him like a kicking horse. You're a big bum, Bill Larsen, that's all you are! Maybe you've killed this man, and he's a good man, ready to fight for women and children."

The men were gathered in a knot around the injured man, who lay white and still, his head resting on Helmi's knee.

"Bring me water!" she cried, "and stand back."

Bill Larsen sauntered out jauntily, biting a disk from his plug of chewing tobacco. "No man can slap my face and feel as good as ever right after," he said. "Damn him and his British Empire."

Mrs. McMann was diplomatic. Bill Larsen was a boarder, regular and sure, paid in advance. Besides, he came from the States, and from Nebraska. "Bill, maybe, is too tonguey," she said, "but sticks and stones may break your bones, but calling names won't hurt you." The Englishman struck the first blow, so he will have to take what's comin'."

Arthur Warner certainly did not seem disposed to resist as he lay limp and bleding, his eyes closed, one arm hanging lifeless.

"He'll never never make a soldier if he folds up like that with one knock," said Mrs. McMann scornfully.

"Big Bill hits too hard," said Helmi, bathing the pallid face. "Mr. English only hit a little slap."

The men had gone back to the table, helping themselves from the blue coffee pot on the stove outside. They were satisfied that the Englishman was not seriously hurt. Fights were too common to attract very much attention, particularly at meal-time.

"Well, here's a pretty how-do-you-do, I'll say," said Mrs. McMann, as she began to carry out the dishes. "Let the police hear of this and it gives the house a bad name. And who's to look after the fellow now, supposin' Bill has knocked him cuckoo! I guess maybe he didn't have far to go, but that won't make it easier for Bill."

Bill had come back to the scene of his triumph and now stood leaning against the kitchen door, smoking a tranquil pipe. "Me?" he queried, "Don't worry about me—I always bury my dead!" Bill laughed a little nervously, not feeling quite so unconcerned as he appeared. The face of the Englishman was so corpse-like.

"Well, he can't stay here," said Mrs. McMann, decidedly; "I am providin' meals and beds, but only for well people. This is no 'ospital."

"He can come to my house," said Helmi, "he is a brave man, ready to fight for Canada, and I will take care of him and be glad to do it. He is not a coward, like Big Bill Larsen, who hits like a kicking mule."

"You chuck that gab, Helmy," said Mrs. McMann severely; "it ain't your place to interfere in gentlemen's politics, anyway."

Big Bill regarded Helmi with an angry eye. "Turning against your own country, eh, Helmi," he said to her in Finnish, "you turned me down for Jack Doran, that didn't take long to get tired of you and quit, and now I see you've turned against your own country."

"Canada is my country," Helmi replied, with flashing eyes, "and I would fight for it if I could. I wouldn't hang back like a big coward."

Arthur Warner was not able to leave on the train that day, nor for a week, during which time he was carefully nursed by Helmi and old Sim, the night watchman.

Mrs. McMann discussed the matter in its social aspect with her boarders. "Helmi is a queer girl, but she's goin' to get herself talked about this time, takin' a strange man into her house when her own man is away. I told her—I've warned her all along—but do you think she'd listen? Her and Old Sim are hand in glove, and no one can tell them anything. She says it's her duty to care for a soldier who is goin' out to die for all of us. Well, he don't need to die for me—I'm an American citizen, and I guess Old Glory will always protect me. I wonder what Jack Doran would say if he came home right now? If I know men, and I certainly should, a thing like this will take a lot of explainin'. Poor Mr. McMann would have shot any man whom he found in his house like this. He was so impulsive where I was concerned. He didn't even like to have me left alone with the ice-man. I told him it was nonsense, but nothing could change him!"

But, Helmi and her guest were not concerned over public opinion. Strangely enough, neither of them had thought about it. The doctor from Bannerman had set the broken arm, and advised him to lie still until the dizziness in his head had gone.

The time passed pleasantly for Helmi. She was glad to have someone to care for, and "Mr. English," as she called him, was so grateful. When he tried to pay her, Helmi firmly refused to accept anything. "You are a good man," she said, "leaving everything to go to fight for us. I am glad to help you. I wish I could do more."

It came to the last day, and Arthur Warner was sitting in the rocking-chair watching Helmi as she packed his valise. She had taken out his things, washed his shirts and socks, mended them, and pressed his clothes. "By Jove, Helmi!" he said, in admiration, "you are a born nurse, so quiet and capable. They are calling for nurses over there—can't you come along? I have lots of friends there who haven't forgotten me, I am sure, and they would get you in. You are too smart a girl to be just a waitress."

Helmi held up a little garment which she had been making, and quite frankly told him why it was impossible for her to go.

The Englishman apologized humbly.

"Oh, no," said Helmi, "it's all right; I do not mind telling you. No one here knows yet, but I am not sad about it. I am glad, I am only sad about Jack being away."

"I love what you said about your mother," said Helmi after an interval of silence. "You would fight for her even if she were wrong. No, she couldn't be wrong to you. That is a lovely thing. Do all men feel like that? I would like to have a son who would feel like that for me."

"I think all decent men do feel that way," Warner said simply.

(To Be Continued.)

A Blessing to People of Advanced Years

Gin Pills relieve sufferers from kidney and bladder trouble

"I wonder if you really know what a blessing Gin Pills are to people of advanced years.

"I am 72 years of age, and suffered for a considerable time with kidney and bladder trouble. My rest was broken through having to get up in the night three and four times. Later I suffered with pains in the bladder, and my son, who had used Gin Pills for pains in the back and lumbago, bought me a box. Before I had finished it I was relieved of the pains in my bladder and had to get up less frequently. At my age I can scarcely expect to be permanently free from troubles of this kind, but if Gin Pills will give others the relief they have given me, they will be a blessing indeed."

(Name on request.)

Prompt and lasting relief has been found in Gin Pills by thousands of people of advanced years who have had kidney or bladder trouble. If even slightly troubled in this way, get a box today at your druggist's—50c. National Drug & Chemical Company of Canada, Limited, Toronto, Canada.

Trail Riding In the Rockies

There is no place in the Canadian Rockies where trail riding is more enjoyable than in Waterton Lakes National Park, in southern Alberta. Over 150 miles of trails, broad, well-made and so safe that not even the most timorous may feel alarm, are open to the visitor. Nearly a score of trips can be arranged from the townsite of Waterntou Park.

Dismal Patient: "Yes, doctor, my head is like a lump of lead, my neck's as stiff as a drainpipe, my chest's like a furnace, and my muscles contract like bands of iron."

Doctor: "I'm not sure you shouldn't have gone to a hardware dealer."

ECZEMA ITCHED AND BURNED

On Arms and Legs Six Years. Cuticura Heals.

"When I was a small boy eczema broke out on my arms and legs in small pimples. As I grew older the eczema became wet and turned very red, and my clothing aggravated it. It itched and burned so that many a night I could not sleep. The trouble continued for six years.

"A friend advised Cuticura Soap and Ointment so I sent for a free sample. I found great relief after using it so purchased a cake of Cuticura Soap and a box of Cuticura Ointment which healed me." (Signed) Louis W. Plunz, 7128 Jasper Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

C.P.R. Has Big Program

Will Employ Thousands Of Men and Spend Millions Of Dollars On New Work In West

Work for thousands of men in Western Canada and payrolls running into millions of dollars are indicated in the western building and expansion program of the Canadian Pacific Railway for the 1928 season. The details of the program were announced by D. C. Coleman, vice-president of western lines.

Tenders are already out for some of the work and operations will be pushed to the utmost as soon as spring opens up.

In Saskatchewan new stations will be erected at McMahon, Armley, Sylvania, Laevert, Neilburg, Crane Valley, Tuberose, Rockglen, Coronach, Fox Valley and Carmichael.

At Queenstown and Hebbema in Alberta, new stations will be erected, the program states. A number of stations will be erected at different towns in Manitoba. The capacity of the Weston freight car shops near Winnipeg are to be doubled and the locomotive shops enlarged.

At the town of Hardisty, Wilkie and Goudie, in Saskatchewan, new coaling plants will be built and the same construction will occur at Vulcan, Alta., and at Crow's Nest. Nelson and Tadanac in British Columbia. Additional washout plants will be installed at Calgary. Red Deer terminal will be extended, additional trackage will be built at Ogden, Calgary and Winnipeg and at Vancouver new tracks will be built to serve the company's piers and also to serve the grain elevator to be constructed near the Second Narrows bridge.

A very extensive program of bridge replacements will be undertaken and approximately 250 miles of 100 pound steel will be placed in the main track west of Swift Current.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first dose to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pubnico, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Heavy Livestock Shipments

Livestock handled during the year 1927 at Lethbridge at the yards was double the total of 1926. Hogs showed a 50 per cent. increase due to heavy shipments to the United States coast markets, and horses doubled in number due to shipments to Russia and a keen demand in Eastern Canada. The sheep run was exceptionally heavy.

Shipbuilding In Canada

A total of 395 ships were built in Canada during 1926, according to a report of the Department of Marine and Fisheries. These vessels had an aggregate gross tonnage of 48,395 and a net tonnage of 37,806. British Columbia led in the shipbuilding with 253 vessels to her credit.

Minard's Liniment kills warts.

Clerk—"You say it's not ink in this bottle? Why, certainly it's ink."

Shopper—"Well, it says right here on the label: 'made by the Blank & Blank Company. Not inc.'"

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Pierre Charles L'Enfant, a French engineer, planned the layout of the city of Washington in 1791.

Success is merely the matter of doing the right thing at the right time.

ASPIRIN

To break a cold harmlessly *and in a hurry* try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Little Helps For This Week

"Be not hasty in thy spirit to be angry; for anger resteth in the bosom of fools."—Eccl. vii. 9.

As through an ill-thatched roof
The pelting rains descend,
So an unthinking mind
The stormy passions rend;
As well-thatched roofs defy the rain,
So passions crash and dash against
The thoughtful mind in vain.
—The Dhammapada.

Like those who burn their houses and themselves within them, anger makes all things within full of confusion, smoke, and noise; so that the soul can neither see nor hear anything that might relieve it. Wherefore, sooner will an empty ship in a storm at sea admit of a governor from without, than a man, tossed with anger and rage, listen to the advice of another, unless he have his own reason first prepared to entertain it.—Plutarch.

Prince Owns Oyster Beds

Leases Ground In Duchy Of Cornwall To Company

I wonder how many people know that among the many varied possessions of the Prince of Wales are flourishing oyster beds in the Duchy of Cornwall. The Prince does not breed them himself, but leases 400 acres of ground at Port Navas to a company and allows them to be bred in the River Fal and afterwards transferred to a stretch of "sweet" water at Helford. Although he is not a great oyster-eater, himself, H.R.H. takes such an interest in an industry which gives employment to many of his Duchy tenants that I hear he has converted the King not only to having a regular weekly supply sent to Buckingham Palace, but to having no others on the royal table.

Another Aid To Aviation

Radio Signals Guide Pilots Through Fog and Storm

One more obstacle to safe aviation — fog — is about to be overcome through experiment, says Col. Paul Henderson.

"Since radio engineers have found that radio waves can be directed through ether," Col. Henderson said, "experts have evolved a system of guiding pilots through fog and storms by means of radio signals.

"In a recent experiment one airman had been guided through an intense fog from a New York field to one in Western Pennsylvania."

In order to demonstrate the advantage of using clean seed special seed-cleaning machinery is to be taken through the province of Nova Scotia by the provincial Department of Natural Resources for the purpose of enabling farmers to clean their seed.

Jules Verne was born a hundred years ago, and the extravagant fancies that made him a popular writer of fiction have become the sober commonplaces of our everyday life.

On fishing trips take Minard's.

More than 65 per cent. of the passengers who cross the Atlantic to see Europe are women, many of them elderly. Seventy per cent. of the passengers on cruises are married couples.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Fish bones are being turned into ornaments for women's hats by an English firm.

Bubonic plague killed off one-fourth of the world's population in 1348.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.
